## Best Soft Furnishings/Interior Design

### Betta Style Kitchens & Joinery In conjunction with CP & Co

Sponsored by ACFA

This customised banquette seating was designed to engage the whole family, including one family member who is in a wheelchair. Consideration was given to the requirement for easy meals as well as working or studying. A modern and sleek aesthetic has been created thanks to the selection of premium materials for all structural and decorative elements. The materials enhance the overall appearance of the joinery works and blend with the existing colour palette. Embossed woodgrain face materials were chosen for the cabinetry which was horizontally grain-matched for additional appeal. This sits beautifully next to the Murano tan leather for the seat and back rest.

*"During the judging process there was one clear winner. We were impressed with the aesthetic and practical choice of materials for cafe seating which brings warmth to the space." – ACFA judges*
